Journal of Microbiological Methods 1 (1983) 354–356
Elsevier

Contents of Volume 1

Number 1, February 1983

Combined procedure for assays of poly-β-hydroxybutyric acid and inorganic polyphosphate (JMM 00001)
J.S. Poindexter and L.F. Fley (New York, NY, U.S.A.) 1
Selected ion monitoring for rapid differentiation of mycobacteria isolated from domestic animals (JMM 00002)
R. Bergman, L. Larsson, G. Odham and G. Westerdahl (Lund, Sweden) 19
Sensitive assay of phospholipid glycerol in environmental samples (JM 00003)
M.J. Gehron and D.C. White (Tallahassee, FL, U.S.A.) 23
Anaerobic column chromatography in the presence of detergents and its application to a bacterial HCN-producing enzyme (JMM 00004)
F. Wissing (Aarhus, Denmark) 33
Purification of the *N*-acylaminosulfonates, unusual lipids of gliding bacteria (JMM 00005)
W. Godchaux III and E.R. Leadbetter (Storrs, CT, U.S.A.) 41
Biomass measurement of methane forming bacteria in environmental samples (JMM 00006)
R.F. Martz, D.I. Sebacher and D.C. White (Tallahassee, FL, and Hampton, VA, U.S.A.) . 53

Number 2, April 1983

Capillary gas chromatography using electron capture or selected ion monitoring detection for the determination of muramic acid, diaminopimelic acid and the ratio of D/L-alanine in bacteria (JMM 00007)
A. Tunlid and G. Odham (Holgonavägen, Sweden) 63
A simple method for the purification of myxobacteria (JMM 00009)
H. Reichenbach (Braunschweig, F.R.G.) 77
Rapid GC mol% screening of primary culture lysates using horizontal slab gel electrophoresis (JMM 00008)
M.T. MacDonell, F.L. Singleton, D.B. Roszak, M.A. Hood, D.L. Tison and R.J. Seidler (Pensacola, FL and Corvallis, OR, U.S.A.) 81
A micromethod for the quantitative determination of the viability of *Candida albicans* hyphae (JMM 00010)
T. Hashimoto (Maywood, IL, U.S.A. 89
Affinity of pertussis toxin produced by *Bordetella pertussis* for human haptoglobin: application to the in vitro assay of the toxin (JMM 00011)
H. Sato, Y. Sato and A. Ito (Tokyo, Japan) 99
Measurement of muramic acid in marine sediments by high performance liquid chromatography (JMM 00012)
D.J.W. Moriarty (Cleveland, Queensland, Australia) 111
Serological identification of group D streptococci using commercial antisera (JMM 00013)
K.D. Hampton and B.L. Wasilauskas (Winston-Salem, NC, U.S.A.) 119
Erratum 125

Number 3, August 1983

Comparisons and applications of methods for assessing the cellular viability of *Blastomyces dermatitidis* (JMM 00014)
A.M. Sugar, E. Brummer and D.A. Stevens (San Jose and Stanford, CA, U.S.A.) 127
A simple and versatile micro-computer program for the determination of 'most probable number' (JMM 00015)
K.R. Clarke and N.J.P. Owens (Plymouth, U.K.) 133
A simple and direct method for recording swim tracks of protozoa: effects of lectins on *Paramecium* (JMM 00016)
S.E. VanDenBrink and E.S. Kaneshiro (Cincinnati, OH, U.S.A.) 139
Improved histochemical techniques for the detection of *Acremonium coenophialum* in tall fescue and methods of in vitro culture of the fungus (JMM 00018)
E.M. Clarke, J.F. White and R.M. Patterson (Auburn, AL, U.S.A.) 149
A radiotracer microculture technique for the mass screening of isolates of soil actinomycetes for antibiotic activity (JMM 00019)
D. Keast and L. Sanfelieu (Nedlands, WA, Australia) 157
Incompatibility group identification for repressed plasmids using host cell lysis by specific bacteriophages (JMM 00020)
D.E. Bradley and J. Fleming (Newfoundland, Canada) 171
A simple small-scale culture vessel suitable for comparative studies on facultative anaerobes growing under aerobic and anaerobic conditions (JMM 00021)
G. Coleman and I.T. Garbutt (Nottingham, U.K.) 177
An apparatus for the continuous and simultaneous monitoring of oxygen and solute uptake by growing microbial cultures. Application to synchronous and asynchronous cultures of *Escherichia coli* (JMM 00022)
R. Misri and R.K. Poole (London, U.K.) 181

Short communication
Application of the microwave oven to scale-up in biological temperature-shift experiments (JMM 00017)
M. Belfort (Albany, NY, U.S.A.) 191

Erratum 197

Number 4, September 1983

An improved preparation method for a titanium(III) media reductant (JMM 00023)
T.T. Moench and J.G. Zeikus (Madison, WI, U.S.A.) 199
Direct susceptibility testing on positive blood cultures using Autobac I (JMM 00024)
E.R. Bannister, C.Y. Hill and J.P. Manos (Charleston, SC, U.S.A.) 203
Population dynamics of aquatic bacteria in relation to environmental change as measured by factor analysis (JMM 00025)
M.A. Holder-Franklin and L.J. Wuest (Windsor, Ontario, Canada) 209
The use of cluster analysis to help determine the function of plasmids in marine *Vibrio* species (JMM 00026)
H.S. Hada, M.I. Krichevsky and R.K. Sizemore (College Park, MD, Bethesda, MD and Wilmington, NC, U.S.A.) 229
Desorption of adherent bacteria from a solid hydrophobic surface by oil (JMM 00027)
M. Rosenberg, H. Judes and E. Weiss (Ramat-Aviv, Israel) 239
Influence of urea on the resolution of lipopolysaccharides in sodium dodecylsulfate polyacrylamide gels (JMM 00028)
D.L. Diedrich, A.R. Domenico and J.A. Fralick (Lubbock, TX, U.S.A.) 245

Announcement 253

Number 5, November 1983

Modifications enhancing reproducibility and sensibility in the turbidimetric assay of hyaluronidase (JMM 00029)
Y.C. Tam and E.C.S. Chan (Montreal, PQ, Canada) 255
Production, long term preservation and synchronous germination of aerial spores of *Streptomyces* (JMM 00030)
J. Šťastná and I. Janda (Prague, Czechoslovakia) 267
An evaluation of methods for the detection of carbohydrate fermentation in avian *Haemophilus* species (JMM 00031)
P.J. Blackall (Yeerongpilly, Queensland, Australia) 275
A simple assay of cyclic-AMP phosphodiesterase in the presence of interfering enzymes in *Vibrio harveyi* (JMM 00032)
J.C. Makemson (Miami, FL, U.S.A.) 283
Measurement of the activity of attached bacteria using a sorption microcalorimeter (JMM 00033)
A.S. Gordon and F.J. Millero (Miami, FL, U.S.A.) 291
The identification of dimethylphenylarsine as a microbial metabolite using a simple method of chemofocusing (JMM 00034)
W.R. Cullen, A.E. Erdman, B.C. McBride and A.W. Pickett (Vancouver, BC, Canada) . 297
A rapid method for the determination of the base composition of bacterial DNA (JMM 00035)
J. Flossdorf (Braunschweig, F.R.G.) 305

Number 6, December 1983

Direct measurement of dissolved gases in microbiological systems using membrane inlet mass spectrometry (JMM 00036)
D. Lloyd and R.I. Scott (Cardiff, Wales) 313
Micromethods for the spectrophotometric determination of bacterial protease activities (JMM 00037)
K.W. Klinger (Cleveland, OH, U.S.A.) 329
A rapid screening method to detect ethanol production by microorganisms (JMM 00038)
C.J. Jacobs, B.A. Prior and M.J. De Kock (Bloemfontein, South Africa) 339
A modified method for the cultivation of phototrophic bacteria (JMM 00039)
K.A. Malik (Göttingen, F.R.G.) 343
